Scam and Fraud Protection Policy

Briefing for Branch and Contact Centre Staff

Group Fraud Risk Management · October 2026

Agenda

- Why this policy and what it covers
- Common scam types we see today
- Customer protection measures
- Reporting a suspected scam
- Liability and refund framework
- Kill switch and account recovery
- Staff responsibilities

Scope of the policy

- Applies to all retail customers holding a Credit Card, Personal Instalment Loan, savings or current account with Sample Bank.
- Covers unauthorised transactions, phishing, malware-enabled fraud and social-engineering scams.
- Aligned with the fictional Shared Responsibility Framework issued under Notice F-218 on Digital Payment Safety.
- Effective 1 October 2026; replaces the E-Payments Fraud Guidelines dated 1 March 2024.

Common scam types

Scam type	Typical approach	Share of cases (Q3 2026)
Phishing	SMS or email with a fake bank login link	38%
Job scam	Paid 'tasks' that require upfront transfers	21%
Investment scam	Fake trading apps promising high returns	17%
Government official impersonation	Caller claims the customer is under investigation	14%
E-commerce scam	Goods paid for but never delivered	10%

Figures are fictional and for illustration only.

Customer protection measures

- 12-hour cooling-off period after a new device is activated for digital token; high-risk transactions are blocked during this window.
- Default daily transfer limit of SGD 1,000 for new payees in the first 24 hours.
- Real-time SMS and in-app alerts for every card-not-present transaction above SGD 10.
- Money Lock: customers can lock a portion of their savings so it cannot be transferred digitally.
- Outgoing calls from the bank never ask customers for their OTP, password or card PIN.

Reporting a suspected scam

- Customers report via the 24/7 Fraud Hotline 1800-555-0199 or the in-app 'Report Fraud' button.
- Staff must log the case in the Fraud Case Manager within 30 minutes of the customer's report.
- The bank attempts a recall of funds from the receiving bank within 2 hours of the report.
- Customers receive a case reference number and a first update within 3 business days.

Liability and refund framework

Situation	Customer liability	Refund timeline
Bank failed to send a required alert	None - full refund	Within 14 business days
Unauthorised card transaction reported within 30 days	Maximum SGD 100	Within 14 business days
Customer shared OTP or password with a scammer	Full loss, unless bank duties were breached	Assessed within 30 business days
Authorised transfer to a scammer (social engineering)	Case-by-case review	Assessed within 30 business days

Kill switch and account recovery

- Customers can activate the Kill Switch in the app or by calling the Fraud Hotline; it freezes all cards and digital banking at once.
- Reactivation requires identity verification in person at a branch with original NRIC or passport.
- Credit Card instalments and Personal Instalment Loan repayments due during the freeze are not charged late fees for up to 30 days.
- Replacement cards are issued free of charge within 5 business days.

Staff responsibilities

- Complete the annual Scam Awareness e-learning by 31 January each year.
- Watch for red flags at the counter: elderly customers making large first-time transfers, customers on the phone with a 'helper', urgency.
- Staff may delay a suspicious counter transaction by up to 24 hours with branch manager approval.
- Escalate suspected mule accounts to Group Fraud Risk Management the same day.
